

WHEN THEY GET TO THE CITY  
EVERYONE FINDS A STREAM IN THEIR BACK YARD,  
SOME SOON BEGIN TO BELIEVE THAT IT SHOULD BE RE-ROUTED,  
OTHERS THINK IT IN NEED OF A SERIOUS CLEAN UP,  
AND STILL OTHERS CONCLUDE THAT A NOISE ABATEMENT BUFFER SHOULD BE BUILT AROUND IT;  
THEN A FEW -- A FEW FIND THEMSELVES HOLDING THE NOTION THAT  
THE STREAM'S FLOW, IN FACT, SHOULD BE STOPPED.

THEY EACH AND ALL, (TO SAY THE LEAST), FACE A DAUNTING TASK.

EVERYONE IS FRIGHTENED BY STRANGE NOISES --

- EVERYONE WAS ORIGINALLY FRIGHTENED BY THEIR OWN CHEMISTRY.

WHEN THEY GET TO THE CITY  
EVERYONE FINDS A STREAM IN THEIR BACK YARD,  
SOME SOON BEGIN TO BELIEVE THAT IT SHOULD BE RE-ROUTED,  
OTHERS THINK IT IN NEED OF A SERIOUS CLEAN-UP,  
AND STILL OTHERS CONCLUDE THAT A NOISE-ABATEMENT BUFFER SHOULD BE BUILT AROUND IT  
THEN A FEW -- A FEW FIND THEMSELVES HOLDING THE NOTION THAT  
THE STREAM'S FLOW, IN FACT, SHOULD BE STOPPED.

IS THERE NOT YET ANOTHER POSSIBILITY !?
